

# Falls of the Ohio State Park

## May Programs and Classes

**April 30, 2:00 PM**

### **Identifying Warblers**

**(and Warbler Walk May 3, 9:00 AM)**

A wonderful variety of small insectivorous warblers visit the woods at the Falls in the Spring. This class will include a slide show on how to identify species. **Bring your binoculars and take a guided walk to spot them on May 3.** Del Striegel, Birder and Naturalist at Heart Volunteer, will conduct the program.

**RSVP: (812) 280-9970**

**May 7, 1:00 PM & March 10, 9:30 AM**

### **Identifying Deciduous Trees**

This class uses techniques including a dichotomous key to easily identify the deciduous trees found in our area. Program includes a walk in the woods to demonstrate how the key works. Connie Farmer, Interpretive Naturalist, will conduct the program

**May 21, 1:00 PM**

### **Origin of the Ohio River**

How old is the Ohio River? What was the dominate river in the region before it existed? How did the Ice Age affect the Ohio Valley? These questions and others will be answered. There is an amazing story to be told. Dr. William 'Drew' Andrews, Kentucky Geological Survey, will conduct the program.
